

## **Cloud Engineer**

Mo-Sys Engineering Ltd  
Cambridge, CB5 8LA  
Permanent, Full-Time

### **About the Role:**

This is a rare opportunity for a mid-level cloud systems engineer to work on cutting-edge and creative tools with a leading designer and manufacturer of advanced camera robotics and game-changing technologies for film, TV, and live broadcast. You'll be a core technical team member working with colleagues in development to build, maintain and support cloud infrastructure products.

To be successful in this role, you'll be comfortable working with infrastructure within a scaling organisation. You'll be a part of an expanding business in a role that will truly allow you to test yourself and become a vital and valued member of the team.

### **What You'll Do:**

- Use your technology stack and tooling to operate and evolve applications quickly and reliably
- Use practices to automate processes and independently accomplish tasks to enable a more effective service for our customers
- Design, implement and maintain new systems
- Maintain and upgrade existing systems
- Onboard and support customers of our cloud products

### **What We're Looking For:**

- You have experience with Linux Systems Administration, ideally with Ubuntu.
- You have knowledge of scripting languages, such as Shell and Python.
- You understand cloud-based systems, ideally AWS.
- You have good knowledge of networking technologies.
- You communicate ideas clearly, engage thoughtfully with other perspectives and compromise when needed.
- You enjoy collaborating cross-functionally to accomplish shared goals. You care about learning, growing and are aware of those around you.

### **Nice to Have's:**

- You have knowledge of video formats, compression, etc.
- You have interests in game engines such as Unreal, Unity, etc.
- You have experience with programming languages such as C++ and Java.

### **Benefits & Perks:**

- Flexible working hours
- Casual office environment
- Private health insurance
- Group life insurance
- Cycle to Work scheme
- Discretionary annual bonus
- Social events

**About Us:**

Mo-Sys is an award-winning, world-renowned manufacturer of virtual production solutions and camera robotics for film, HETV and broadcast, empowering high-quality AR, VR and virtual production.

We ship to broadcasters in 40+ countries to a customer base including BBC, Netflix, Fox, CNN, ESPN and Sky. Mo-Sys remote heads and robotics are used on many Hollywood blockbusters including Life of Pi, Birdman, Shape of Water, Tron, Source Code and Adjustment Bureau. We have also delivered boundary-pushing technology projects in close collaboration with clients like Red Bull Air Race and the film Gravity.

We pride ourselves on having endless creativity, a “can do” attitude and a friendly family feel to the company. We’re looking for people who want to make a difference and have a hardworking and collaborative attitude.

The above list of job duties is not exclusive or exhaustive and the post holder will be required to undertake such tasks as may reasonably be expected within the scope and grading of the post. Job descriptions should be regularly reviewed to ensure they are an accurate representation of the post. (07/06/2022).
